Congkai Sun - Homepage Design Document

Project Description

This project aims to build a personal website and it should be at least two pages and at least one JS(Vanilla) feature which contains my skills, projects, hobbies, etc. The URL should be of W3C compliance, and the coding files should be formatted by Prettier and Eslint.

Primary information in my homepage:

- Home: This page contains my background information, skills, experience, and contact information.
- Projects and Publications: This page contains the work I have done so far.

User Personas

Persona: Linda, the hiring manager

- **Age:** 42
- **Occupation:** Hiring Manager at a Tech Company
- **Background:** Linda is in charge of recruiting talent for her company. When she hears of potential candidates, she sometimes looks beyond the traditional resume, exploring their personal brand and online presence to get a better sense of who they are both professionally and personally.
- **Device:** Primarily browses on a desktop during work hours but occasionally checks on her mobile

User Stories

1. As Linda, I review the job application on my desktop.
2. AS Linda, I notice a link to a personal homepage and decides to check it out.
3. AS Linda, I first look for "Home" or "Project" section to understand the depth and quality of work.
4. AS Linda, I note down my observations and consider them in the overall evaluation of the candidate for the company's open position.
